EDUCATION

Maharishi Markandeshwar (Deemed to be University), Mullana Ambala, Haryana
B.Tech (CSE); Cumulative GPA: **8.56/10** 2023-Present
Relevant Coursework: Software Engineering, Operating Systems, Data Structures, Databases, Mathematics
Ram Prasad DAV Senior Secondary School, Shahbad Markanda, Haryana 12th (2023) - 86.67%

PROJECTS

Custom Game Engine (C++) (In Progress) [DarkFlame774/BAD](#)

- Designed **modular C++ game engine** architecture with core **application framework** and **logging system**.
- Configured **build system** using **Premake**; integrated **external libraries (GLFW)** and managed project dependencies.
- Implemented **compile-time optimizations** with **precompiled headers** to improve build performance.

Console Tetris (C++) - Personal Project (Playable Demo Available) [DarkFlame774/Tetris](#)

- Created a complete **console-based Tetris** game in **C++**.
- Built **core game loop**, **rotation logic**, **collision detection**, **row-clearing logic**, scoring, and **input handling**.
- Focused on **clean data structures**, **memory-safe design**, and **performance** in a low-level language.

Tower Defense Game (Unity) [darkflame77/failed-defenders](#)

- Developed a Unity tower defense game with **enemy pathfinding** and a **continuous spawn system**.
- Applied **tower placement** and targeting using **OOP** principles.
- **Optimized** performance with **object pooling** and **dynamic enemy scaling**, **increasing enemy health** over time.

ACTIVITIES

Google Developer Groups on Campus MM(DU) Core Team Member (2024-present)
([Chapter Link](#))

- Contribute to organizing **events provided by Google's GDGoC program**; **speaker in 3** such sessions.
- **Provide Game Dev and AR** mentoring to juniors with regular classes and tasks.
- Participate in **12+ hackathons** and **ideathons**, **contributing** to both pitch decks and technical builds.

SKILLS

Programming Languages:	C#, C++, Python (basic scripting for integrations)
Software Tools:	Visual Studio, Unity, Blender (basic)
Backend & Databases:	Node.js, Express.js, MongoDB
Source Control:	Git, GitHub, GitLab
Miscellaneous:	Debugging tools(Visual Studio/ gdb), assembly language for x86 architecture

CERTIFICATIONS AND ACHIEVEMENTS

- **Ethical Hacking (Internshala)** - 2-month course covering web and network vulnerabilities, secure development practices, and basic penetration testing workflows.
- **15+ Skill Badges** on **Google Cloud Skills** platform; GCP Foundations: **Infrastructure in Google Cloud**.
- **TOP 30 Finalist** in the **international 3rd Ideathon** organized by **MODA (Taiwan)**.
- **Hack2Change Finalist**.

ADDITIONAL

Languages: Fluent in English, Hindi
Hobbies: Playing Video Games, Creating Video Games, Reading Books
